

Siva Ranjani S

Angular Developer

Summary

Full Stack Developer with 3.6 years of experience specializing in Angular. Skilled in building responsive, scalable web applications with strong focus on performance, code quality, and user experience. Experienced in full-stack development, REST API integration, and Agile-based delivery models.

Key Skills

- Front-End: Angular, React.js, HTML5, CSS3, JavaScript, TypeScript, Bootstrap, Tailwind CSS, RxJS
- Back-End: PHP, CodeIgniter, Node.js, Express.js
- Databases: MySQL, MS SQL Server
- Version Control & Tools: Git, SVN, REST APIs, Agile Methodology

Professional Experience

Software Developer

Kainos Innovative Solutions, Chennai | May 2022 – Nov 2025

- Developed scalable full-stack applications using Angular, React, PHP, and Node.js.
- Designed reusable UI components improving maintainability and development speed.
- Implemented RESTful APIs and integrated frontend applications with MySQL and MS SQL Server.
- Optimized SQL queries resulting in 30% performance improvement.
- Collaborated in Agile teams, participating in sprint planning, reviews, and code reviews.

Projects

Project 1: Vertex Management System

- Built a real-time auction platform using Angular, PHP CodeIgniter, and MS SQL Server. Implemented dynamic bidding, authentication, and responsive UI.
- Designed and implemented role-based access control for admins and bidders to ensure secure platform usage.
- Integrated real-time bid updates and countdown timers to enhance user engagement and auction accuracy.
- Optimized database queries and stored procedures to handle high-frequency bidding with minimal latency.
- Implemented validation and error-handling mechanisms to ensure data consistency during concurrent bids.
- Collaborated with QA and business stakeholders to test auction workflows and deliver a stable, production-ready solution.

Project 2: Mental Health Event Scheduler

- Created a full-stack scheduling application using React, Node.js, Express, and MySQL.
- Designed and implemented CRUD operations for events, users, and schedules using RESTful APIs.
- Integrated calendar views and date-time validations to prevent scheduling conflicts.
- Implemented user authentication and authorization to ensure secure access to sensitive event data.
- Developed email and in-app notification features to remind users about upcoming events.
- Optimized API responses and database queries to ensure smooth performance and scalability.

Project 3: Payroll and Leave Management System

- Developed payroll automation with leave tracking and approval workflows using PHP and MySQL.
- Designed and developed end-to-end payroll processing modules, including salary calculation, deductions, and net pay generation.
- Implemented leave application, approval, and rejection workflows with role-based access for employees and managers.
- Automated pay slip generation and enabled downloadable salary reports for employees and HR teams.
- Integrated MySQL database procedures to securely store payroll, attendance, and leave records.
- Implemented validation rules and audit logs to ensure payroll accuracy and compliance with company policies.

Education

B.E. Computer Science Engineering
Kings Engineering College, Chennai
