

SIVA RANJANI

Chennai, India | +91 9677178409 | sivaranjani090394@gmail.com

Summary

Full Stack Developer with 3.6 years of experience in designing and developing scalable web applications. Strong expertise in front-end development using **Angular, React.js, TypeScript, JavaScript, and RxJS**. Hands-on experience in backend technologies including **PHP (CodeIgniter), Node.js, and Express.js**, with solid database knowledge in **MySQL and MS SQL Server**. Experienced in REST API development and integration, responsive UI design, and Agile-based project delivery.

Key Skills

- **Front-End:** Angular, Angular Material, React.js, HTML5, CSS3, JavaScript, TypeScript, Bootstrap, Tailwind CSS, RxJS
- **Back-End:** PHP, CodeIgniter, Node.js, Express.js
- **Databases:** MySQL, MS SQL Server
- **Version Control & Tools:** Git, SVN, REST APIs, Agile Methodology

Professional Experience

SOFTWARE DEVELOPER

Kainos Innovative Solutions, Chennai | May 2022 – Nov 2025

- Developed scalable full-stack applications using Angular, React, PHP, and Node.js.
- Designed reusable UI components improving maintainability and development speed.
- Implemented RESTful APIs and integrated frontend applications with MySQL and MS SQL Server.
- Optimized SQL queries resulting in 30% performance improvement.
- Collaborated in Agile teams, participating in sprint planning, reviews, and code reviews.

COMPUTER SCIENCE TEACHER

Manuelmony Matric Hr. Sec. School – Chennai | Dec 2015 – Apr 2022

- Taught computer science from grades 3 to 8, including HTML, MS Office, and basic programming.
- Developed curriculum-aligned learning materials and simplified technical concepts for young learners.

Projects

Project 1: Vertex Management System

- Developed a bidding platform using Angular, PHP CodeIgniter, and MS SQL Server with separate admin and vendor portals.

- Admins can post bids with defined deadlines, while vendors submit their proposals within the specified timeframe.
- Designed and implemented role-based access control for admins and vendors to ensure secure platform usage.
- Built features for admin evaluation and contract awarding to selected vendors.
- Implemented modules for tracking contract details, including status updates, change notifications, duration tracking, and termination workflows.
- Optimized database queries and stored procedures to ensure efficient performance during simultaneous bid submissions.
- Collaborated with QA and business teams to test and validate workflows, ensuring a reliable and production-ready application.

Project 2: Mental Health Event Scheduler

- Created a full-stack scheduling application using React, Node.js, Express, and MySQL.
- Designed and implemented CRUD operations for events, users, and schedules using RESTful APIs.
- Integrated calendar views and date-time validations to prevent scheduling conflicts.
- Implemented user authentication and authorization to ensure secure access to sensitive event data.
- Developed email and in-app notification features to remind users about upcoming events.
- Optimized API responses and database queries to ensure smooth performance and scalability.

Project 3: Payroll and Leave Management System

- Developed payroll automation with leave tracking and approval workflows using PHP and MySQL.
- Designed and developed end-to-end payroll processing modules, including salary calculation, deductions, and net pay generation.
- Implemented leave application, approval, and rejection workflows with role-based access for employees and managers.
- Automated pay slip generation and enabled downloadable salary reports for employees and HR teams.
- Integrated MySQL database procedures to securely store payroll, attendance, and leave records.
- Implemented validation rules and audit logs to ensure payroll accuracy and compliance with company policies.

Education

B.E. Computer Science Engineering

Kings Engineering College, Chennai – 2015
